

TRANSCRIPT PREPARED BY THE CLERK OF THE LEGISLATURE
Transcriber's Office

April 27, 1999 LB 880

so I'd like to make that clear. And I think it's obvious that we do have a situation that is in need, and I personally would like to pledge to you that I'm going to look into seeing why matters like this were not presented to us anyway in connection with the needs of the Health and Human Services Department. So, with that, I turn my time back to the Chair.

SENATOR CUDABACK: Thank you, Senator Pederson. Senator Wehrbein, on the Brown amendment.

SENATOR WEHRBEIN: I was going to, Mr. President, members, I was going to say a little bit like what Senator Pederson said, that sometimes we have difficulty putting the whole big picture together when construction gets scattered to different committees. And I just wanted to call that to attention. I know there's different feelings on that subject here about where they should go, but that is kind of the problem that we have in this particular issue because it wasn't called to our attention. And I know that the Dunbar unit at Geneva, which is the way the amendment is going to be filed on the next bill, the construction bill, will have that in this particular amendment. Now I understand, hopefully, Senator Brown is going to withdraw this amendment, then we can move on and pass LB 880, unless there's more discussion on the budget bill. Then we'll move into the construction bill, which is the next bill. And that amendment that I just talked to you about is filed on that amendment. I'm not sure what Senator Chambers wants to do on that particular bill, on the next one, but it should move us through this particular appropriations bill, LB 880.

SENATOR CUDABACK: Thank you, Senator Wehrbein. Senator Brown, yours is the last light, if you wish to close, or do you wish to use your five minutes, then close?

SENATOR BROWN: Mr. President, members of the Legislature, I will only say that I agree with Senator Landis, that there are issues that need to be dealt with. I believe that there were issues that are part of the underlying amendment that still need to be dealt with. But I do want us to move forward. I want us to move forward on the budget bill. I think that it's important that we move forward, and so with that, I will pull my amendment. Thank you.
